

Abdulaziz Ismail

Software Engineer — Flutter · Next.js · Node.js

bdb05641@gmail.com +970 56 605 0770 Palestine [linkedin.com/in/abdulaziz-barhoum](https://www.linkedin.com/in/abdulaziz-barhoum) github.com/abdismail4

PROFESSIONAL SUMMARY

Software engineer working across the full stack: Flutter mobile apps with different state-management approaches (GetX, Bloc, Riverpod), full-stack web apps with Next.js and TypeScript, and Node.js backend systems built with Express and MongoDB, with real-time features via Socket.IO. Built nine complete projects from idea to implementation, four of them full-stack systems (client + Swagger-documented API server), with hands-on experience in layered architecture and authentic Arabic RTL user experience.

TECHNICAL SKILLS

Mobile: Flutter, Dart, GetX, Bloc / Cubit, Riverpod, Hive, Dio

Web: Next.js, TypeScript, React, Prisma, Zod, Tailwind CSS

Backend: Node.js, Express, MongoDB, Mongoose, SQLite, Redis, Socket.IO, JWT

Cloud & Infra: Railway, Docker, Cloudinary, Firebase, Backblaze B2, Bunny CDN

Tools & Practices: Git, Postman, Swagger / OpenAPI, Layered Architecture, Testing (Jest, Flutter Test)

FEATURED PROJECTS

Al-Noor — Quran Memorization Center Management System

Full-Stack · Flutter + Node.js

Mobile app + documented API server — backend live-deployed on Railway

- Hierarchical geo structure (cities, regions, classes) with daily memorization & attendance tracking
- Real-time chat and notifications via Socket.IO, with five distinct permission roles
- Statistics dashboards and detailed reports

Flutter · GetX · Dio · Hive · Node.js · Express · MongoDB · Socket.IO · JWT · Swagger

Massar — Professional End-to-End Educational Platform

Full-Stack · Flutter + Node.js

Multi-role Flutter app with an advanced Express 5 server

- Course enrollment and progress tracking, with HLS video streaming over a CDN
- Real-time chat between students and teachers, plus a payment system
- AI-assisted weekly schedule generation (OpenAI API)

Flutter · flutter_bloc · Node.js · Express 5 · MongoDB · Redis · Socket.IO · OpenAI API

Performance Tracker — Institutional Task Tracking System

Full-Stack · Node.js

Rebuilt from a desktop (Electron) app into a web app

- Recurring task templates auto-generated monthly, with automated month-close and backups
- Department performance reports exportable as CSV, plus an audit log
- Real automated tests covering status and performance logic

Node.js · Express · MongoDB · Mongoose · HTML5/CSS3 · Tailwind CSS · Vanilla JavaScript

ADDITIONAL PROJECTS

Camp Management System	Registering displaced families and tracking aid distribution (full-stack Next.js)	Next.js 16 · TypeScript · Prisma
Mizan	Sales, debt & transfer management — fully offline, in real daily production use	Flutter · Bloc · Hive
SuperMart Pro	Complete Arabic POS system with barcode scanning and interactive reports	Flutter · Riverpod · Hive
Hisn Al-Muslim	Daily azkar & duas app with prayer times and reminders	Flutter · Riverpod
Masareef	Personal expense & income tracker with PDF/CSV reports	Flutter · Provider
Ghanem Mobile	Marketing landing page for a real client — pure HTML/CSS/JS	HTML5 · CSS3 · JS

EDUCATION

College of Information Technology — Mobile Application Development Department	Grade: Very Good
